

Environmental Services Specialist

7/2/2009

Job Description

ThyssenKrupp is a global leader in carbon and stainless steel with a proven track record of innovation, corporate citizenship, social and environmental responsibility, employee safety and customer satisfaction.

ThyssenKrupp Steel USA is seeking an experienced **Environmental Services** professional to assist our developing processing operations in Calvert, Alabama.

Our **Lead Specialist for Environmental Services**:

- Oversees compliance certification and manages permitting program for continuous improvement
- Develops and implements effective deviation reporting process that meets EPA and other regulatory requirements (air quality, waste water, hazardous materials, etc.)
- Supervises Environmental team in support of company objectives
- Reviews and incorporates regulatory updates
- Effectively communicates and implements permit changes
- Performs periodic monitoring for local, state, and federally enforceable rules
- Develops and obtains variances or alternative operating conditions to protect site from enforcement actions
- Conducts all Title V (as applicable) permit updates for new projects
- Prepares a diverse set of environmental permitting projects including air quality, water quality, and residual waste
- Evaluates and identifies environmental compliance issues, federal, state, and local
- Reviews proposed permit conditions

Job Requirements

Our **Lead Specialist for Environmental Services** will have or demonstrate:

- Must have broad understanding of commonly employed engineering principles, environmental and safety requirements, and familiarity in working with local, state, and federal agencies.
- Must have 10 years experience interpreting standards, rules, and regulations and how they related to the organizations' processes, facilities, and equipment
- Must have previous supervisory/management experience

- M.S. Environmental Engineering, with a B.S. degree in Chemistry, or Engineering (Chemical, Environmental, Mechanical, or Civil), or combination of education and related experience required.
- **CSP Certification** preferred.
- Must have experience interpreting standards, rules & regulations, including OSHA, EPA, NEPA process, etc.
- Must have experience working on a diverse set of environmental permitting projects including air quality, water quality, and residual waste.
- Must have demonstrated ability to negotiate with regulators
- Well developed written and verbal communication skills
- Demonstrated ability to manage multiple projects concurrently
- Proficient with MS Office tools
- Demonstrated ability to influence others in decision making.
- Interest and ability to work at our developing mill operations in Calvert, Alabama
