

**Randy Charles**  
**Founder**  
Greenway Steel

Randy Charles brings over 30 years of experience in the steel industry providing broad experience and expertise in dynamic and ever-changing markets. Successfully planning business and market strategies in support of customer's requirements while capitalizing on business capabilities.

Before founding Greenway Steel, Randy started his career with Bethlehem Steel as both a Production Foreman and as a Quality Engineer before joining Nucor Steel at Crawfordsville in the early days of developing CSP technology. He continued with Nucor as a Technical Service Engineer as well as a Product Manager and had opportunity to support the development of new products and technologies both technically and commercially. Following Nucor's acquisition of the Tuscaloosa Plate Mill, Randy joined the management team as Sales Manager helping to integrate the facility and its product capabilities into the larger enterprise.

Greenway Steel advocates for sustainable global steel industry, the metals supply chain, and manufacturing. provide industry solutions in support of Greenhouse Gas Emissions Reduction Strategies, knowing your carbon footprint, as well as supporting risk management, with offsetting and REC solutions.

Randy is a graduate of the University of Pittsburgh with a degree in Materials Science and Engineering (MSE).
